OBJECTIVE

Enthusiastic and dedicated SAP Security and GRC professional seeking a challenging role in the SAP landscape to apply my expertise in access control, compliance, and security architecture contributing to secure, compliant, and efficient SAP environments while supporting organizational growth through innovation and best practices.

PROFESSIONAL SNAPSHOT

Results-driven SAP Security and GRC professional with 14 years of experience, including leading teams in the design, implementation, and optimization of Access Control and Process Control solutions. Skilled in delivering secure, and efficient SAP environments while driving operational excellence and compliance.

EXPERIENCE SUMMARY

- Have hands-on on SAP applications ECC, BI, BPC, HR, EP, CUA, S/4 HANA, BW/4 HANA, GRC Access Control/Process Control and HANA DB.
- Currently serving as an SAP Security Architect for automation projects, responsible for requirements gathering, solution design, role development, testing, and supporting go-live activities.
- Involved in designing and building S/4HANA, Fiori and MDG roles as part of a greenfield implementation.
- Engaged in greenfield/brownfield implementation for GRC AC 12.0/10.0 and configured all modules (ARA, ARM, BRM, EAM and User certifications) as per requirement.
- Contributed to security upgrades, roll outs and role redesign.
- Expertise in user and role administration.
- Experience on reviewing roles and SOD risks and perform remediation.
- ITGC control execution and reporting related to SAP Security and GRC AC.
- Proficient in supporting audit processes by providing evidence, clarifying auditor questions, and resolving findings.
- Hands-on experience with GRC solutions including Security Weaver (now Pathlock) modules such as Secure Pro, Separations Enforcer, and Emergency Repair, along with Bizrights Approva.
- Experience with legacy SAP GRC versions, including GRC 5.2 (VIRSA Compliance Calibrator) and Access Control 10.0.
- Understands compliance requirements that may impact security and work with business areas and project teams to develop security solutions that address these requirements.
- Participate in team activities and team planning regarding improving team skills, awareness and quality of work.
- Delivered technical training to both new hires and mid-level associates, enhancing their skills and knowledge.
- Documented processes and facilitated knowledge transfer to the team, ensuring smooth handover and continuity.
- Exhibits strong communication skills, both verbal and written, with the ability to convey complex information clearly.

PROFESSIONAL SKILLS

- Build: SAP Security and SAP GRC Access Control Implementation, Security upgrades, Roll outs, Role redesign
- Support: SAP Security production support
- Ticketing tools: BMC Remedy, Footprint, ServiceNow, HPSM, Capgemini service center
